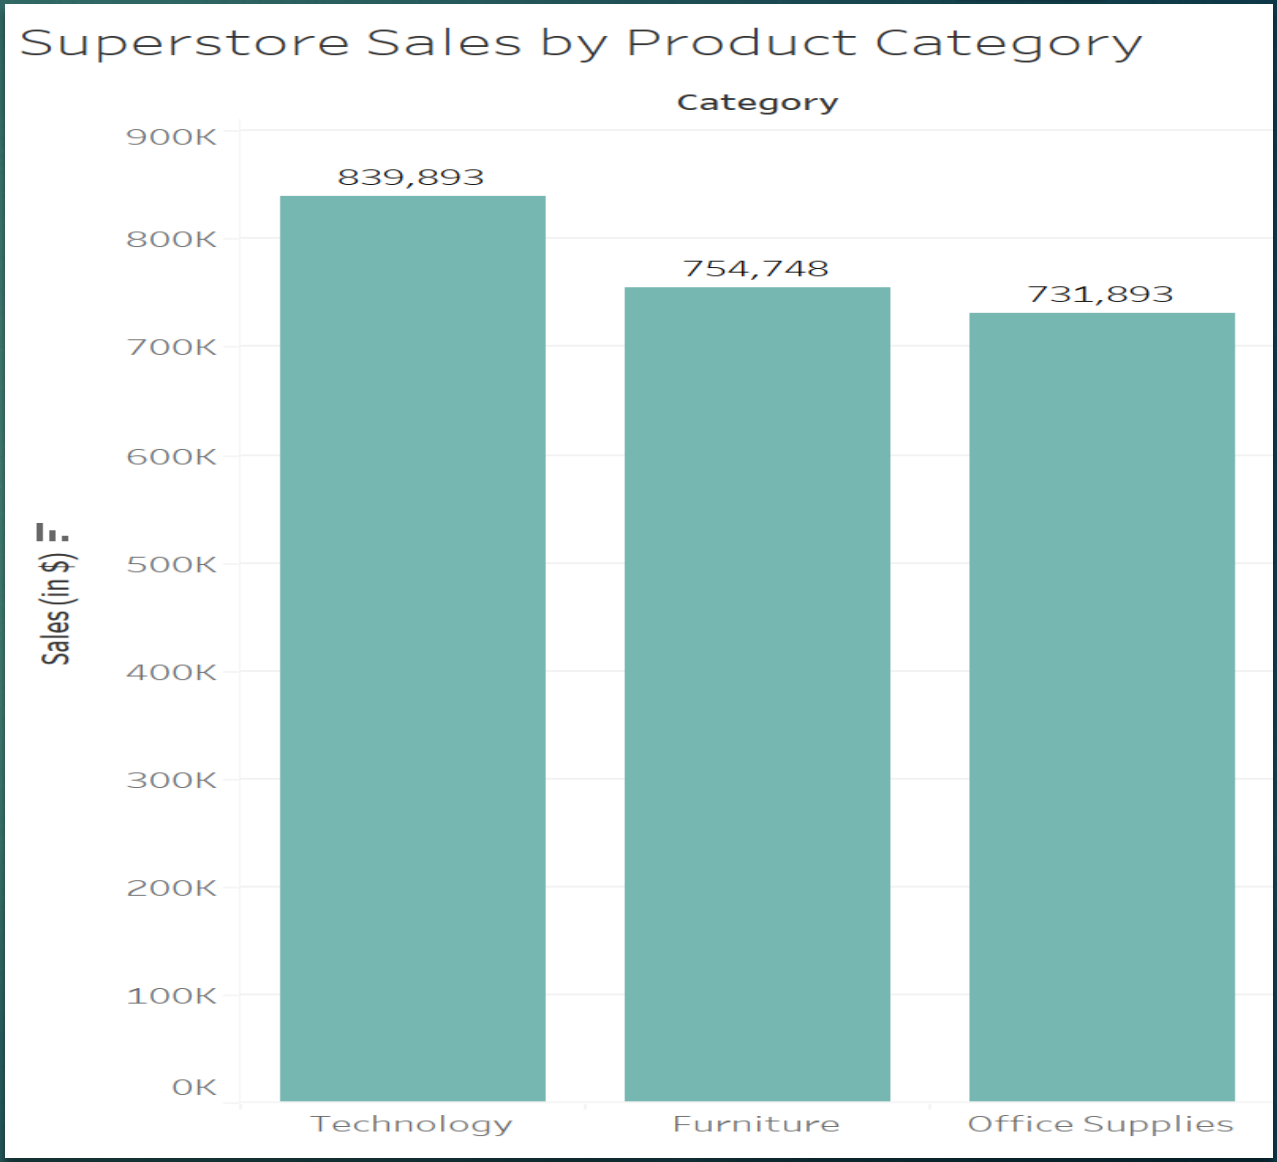
MYLA SIMMONS

Bar Chart

Interpretation: This bar chart shows the Superstore's sales based on the product's category. The bars are sorted in descending order to show which category had the most sales first.

Insights

- Technology was the category with the most sales
  - It might be ideal to keep a larger amount of technology products in stock compared to products in the other categories, especially if there are specific products that are causing the increase in sales for the technology category
  - Furniture was the category with the second most sales, followed by office supplies

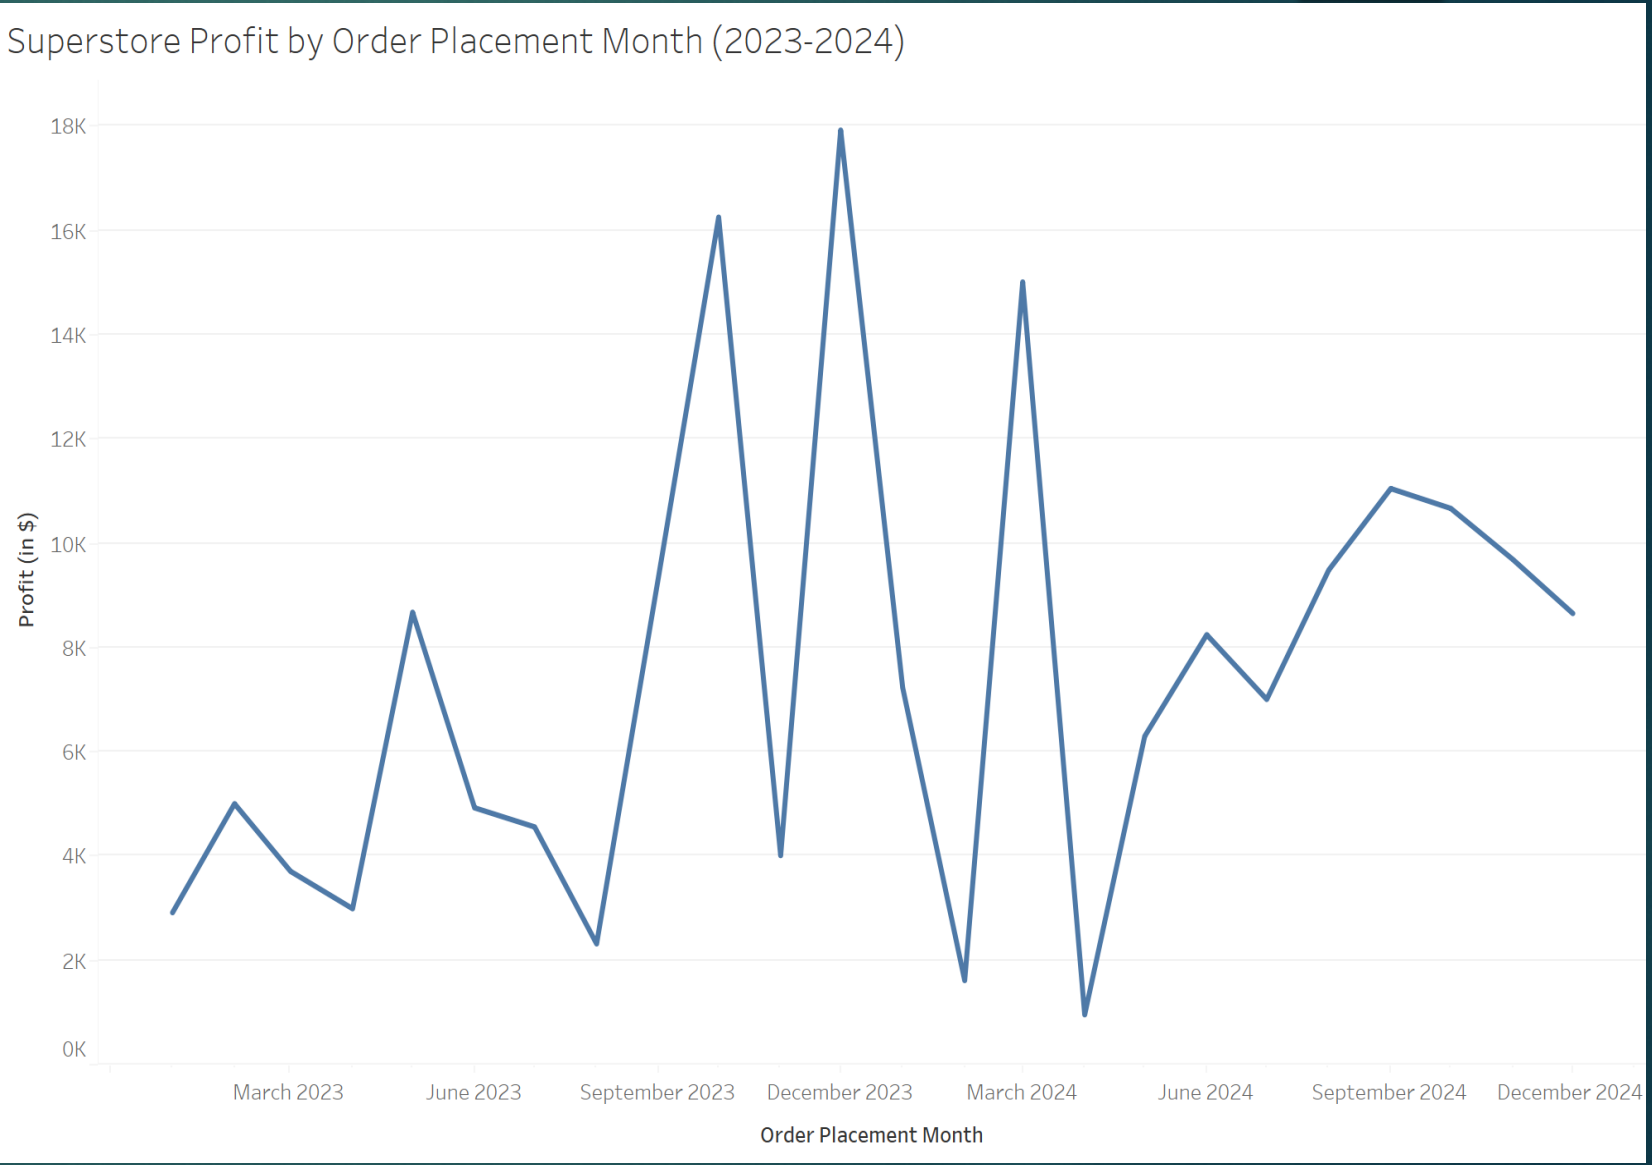


Line Chart

Interpretation: This line chart shows the Superstore's profit based on the month the product was ordered from January 2023 to December 2024.

Insights

- The Superstore had the largest profit in December 2023
  - Profit was also significantly large during October 2023 and March 2024
- The Superstore had the smallest profit in April of 2024
  - Profit was less than $1000



Choropleth Map

Interpretation: This choropleth map compares the Superstore's sales across southern US states.

Insights

- Florida had the highest sales out of all the southern states
  - This is probably because Florida is one of the most populous states in the country and it is the most populous state in the southern region
- With the exception of South Carolina, sales tend to be higher in states in the eastern part of the region compared to states in the western part of the region
